QUILTING SERIES

1600P-QC

# 1600P-QC

# JANOME

## 1600P-QC Features

Maximum speed 1,600spm (minimum 60spm)	Bobbin winding diagram printed on machine top	Thread diagram printed on machine front
Independent bobbin winder system	Memorised needle up/down	Synchronised thread tension lever
Adjustable knee lift	Extra large 225mm x 140 mm arm space	Variable stitch length up to 6mm
Pressure indicator window	Dual lights	Sleek design of home machine
Auto thread cutter	Industrial-type thread take-up lever	Quiet operation with no external motor
Variable speed control	No oil holes on bed	Optional extension table available
Built-in needle threader	Sealed bearings on shafts	Darning foot and darning plate included
HL needle	Up to 11 lbs. of presser foot pressure	Auto thread trimmer switch included
Side-loading, industrial rotary hook	Industrial pre-tension threading	Dust cover

### Ever True Stitch Length

Ensures the truest stitch quality regardless of sewing speed. Also allows easy transition between different layers of fabric.

### Smooth Feeding Thread and Diagram

The 1600P-QC has a pre-tension thread regulator that takes the kinks out of your thread even before it goes through the tension mechanism.

### Side-Loading, Industrial Rotary Hook

Consistent stitching with industrial quality. Side-loading bobbin also allows for easy access even when on a quilting frame.

### More Pressure

The 1600P-QC provides up to 11lbs of pressure from the presser foot. That's the highest pressure available on the market today for a home straight stitch machine. Power through even the thickest layers of fabric without shifting.

### Knee Lift

Give yourself an extra hand with the 1600P-QC's knee lift. The knee lift lets you raise and lower the presser foot without taking your hands off your work. Quilters love this feature.

### Memorised Up/Down Needle Setting

The exclusive Up/Down needle button lets you control the needle's position at the end of the stitch. Set it for UP when you want to move your fabric; DOWN for corners and pivots.
