Adjustable Foot Pressure

Adjustable pressure makes it easier to protect sheer and delicate fabrics.

Fully Automatic Sensor Buttonholes

Drop your button into the sliding gauge and the foot makes your buttonhole the right size every time. The 10 styles of automatic sensor buttonholes include square, rounded, keyhole, knit, heirloom and welted.

Create and Store Your Own Patterns

To make the most out of your sewing ideas, the Memory Craft 5200 has over 500 stitches and a wide variety of useful editing features. The flexibility provided to you by these features will streamline your sewing projects and give you time to focus on truly customising your creations.

One-Hand Needle Threader

Thread the needle easily without eye strain using the convenient one-hand needle threader – its advanced design keeps the lever in place for easy one-hand threading. Pull the thread across the threader and watch as it is automatically fed through the eye of the needle.

Automatic Plate Converter

Selecting straight stitch 1 through 3 automatically reduces the size of the needle hole to give you consistent sewing results. This unique design feature makes it easy to switch between straight and zigzag stitches without switching the needle plate, especially for thin fabrics. Innovative engineering gives you a better way to produce beautiful sewing designs.

Swing-Open Face Plate

Remove lint quickly and easily with the convenient swing-open face plate.
