HOW TO: Create your personalised DotzBox
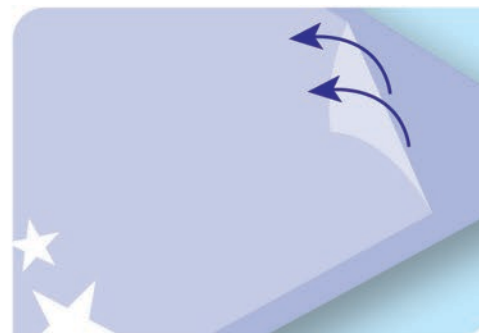

DIAMOND DOTZ®

1 Kit contents: Place grip on stylus, check dotz, glitter, wax, tray and DotzBox canvas.
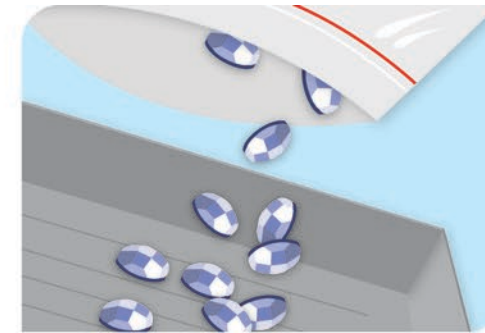

**2** Practice your desired design on a piece of paper. Use this as a guide when dotting.

3 Peel plastic cover sheet. TIP. Only expose area you are working on as the canvas is sticky.
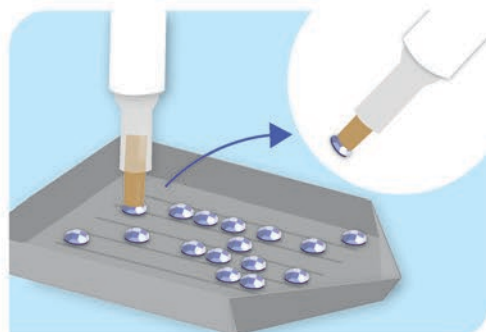

4 Pour a light single layer of dotz into tray. Shake lightly to turn dotz dome side up.
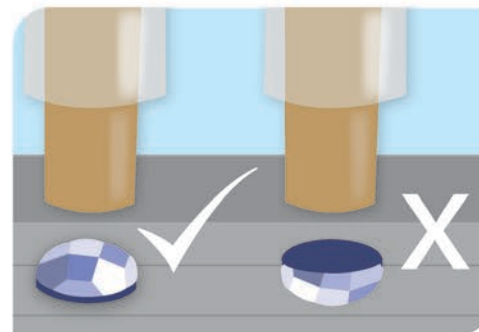

**5** Dip stylus into wax. You may have a wax pot or square. You do not need to reload between every dot.

**6** Pick up one dot lightly, domed side up. If your dot does not stick, reload with wax.

7 Domed side up, flat side down to stick to surface.

8 Place lightly in desired position and repeat steps 6-8 until design is achieved

9 Sprinkle the glitter in a light layer over leftover glue area. TIP. Do the following steps over a bin or work mat for easy glitter cleanup.

10 Once covered, lightly tap the sides of the box whilst angling in different directons for even coverage.

11 Flip over box and tap back gently to remove excess glitter. You may use a very gentle wiping action on the dotz if the glitter has settled on them.

12 Your artwork is ready to show off!
